

Responsible recycling of electrical panels

As part of our continuously work to minimize our environmental impact we offer to recycle tic elkas produced electrical panels once they have reach end-of-life.

tic elkas wants to contribute to the circular economy by making it easy to recycle our electrical panels in an environmental responsible way. All panels manufactured by tic elkas will be eligible for recycling and will be equipped with a label showing information about the concept and how to use it.

Electrical panels will be dismantled at our own facilities and materials will be recycled by our ISO 9001 & 14001 certified waste handler.

The electrical panels will be sorted into fragments such as

Globally recognized examples on CO₂ savings by recycling

Documentation

After recycling a written confirmation that the panel has been recycled according to the description above will be issued.
